Professional Summary

B.Tech student in Artificial Intelligence and Data Science with strong problem-solving skills and growing experience in Python, C, and basic web development. Currently learning data science, statistics, and deep learning, and working on projects like stock price prediction to apply these concepts practically. Interested in using data to understand patterns and solve real-world problems. Focused on improving my coding and analytical skills to build a career as a data scientist.

Technical Skills

Programming Languages: Python, C, SQL, R, JavaScript
Data Science & AI: Pandas, NumPy, Data Preprocessing, FAISS, TF-IDF, Sentence Transformers
Web Technologies: HTML, CSS, JavaScript, FastAPI, Streamlit
Databases & Analytics: MySQL, Power BI, Tableau
Tools & Platforms: Git, VS Code, Jupyter Notebook, Google Colab, R Studio, Selenium, Railway, Vercel
Core Concepts: Data Structures & Algorithms, Information Retrieval, System Design

Experience

- Artificial Intelligence Intern - EagleHiTech** Jun 2025 – Jul 2025
- Applied machine learning techniques to develop AI-driven solutions for multiple data-centric tasks.
 - Improved model readiness through data preprocessing, feature engineering, and performance evaluation.
 - Contributed to predictive and analytical workflows by implementing AI-based approaches.
- Full Stack Development Intern - Internezy** Jan 2025 – Mar 2025
- Developed and tested web application components across multiple modules using front-end and back-end technologies.
 - Enhanced application reliability through testing, debugging, and feature optimization.
 - Collaborated with development teams to deliver responsive and user-friendly software solutions.

Technical Projects

- BIS Standards Recommendation System | Python, FAISS, TF-IDF, FastAPI, Streamlit** May 2026
- Built a hybrid retrieval engine for recommending BIS standards from natural language queries.
 - Combined semantic search and TF-IDF matching to improve retrieval relevance.
 - Achieved 100% Hit Rate@3, MRR of 1.0, and sub-second response latency.
- Scholarship Aggregation System | Python, Selenium, RSS, JSON** Jan 2026 – Mar 2026
- Aggregated scholarship information from multiple online sources into a centralized dataset.
 - Automated data extraction through web scraping, RSS integration, and scheduled workflows.
 - Improved data quality through validation, cleaning, and deduplication.
- PetCare Chatbot (Rule-Based & LLM-Powered) | JavaScript, Node.js, Express, React, Railway** Apr 2026
- Created rule-based and LLM-powered pet care chatbots for automated user assistance.
 - Integrated Groq-powered conversational AI to generate context-aware responses.
 - Deployed scalable backend services and responsive user interfaces.
- Stock Price Prediction Using ML | Python, Pandas, NumPy, Matplotlib, Scikit-learn** Aug 2025 – Oct 2025
- Built a machine learning model to forecast stock price movements using historical market data.
 - Applied feature engineering and data preprocessing to improve prediction quality.
 - Visualized forecasted and actual prices to evaluate model performance.

Achievements & Leadership

- Web Wizard Relay (Resonance'25):** Demonstrated creative problem-solving skills in a technical event.
- Hack Hive (IEEE Breadths 2024):** Participated in a national-level technical symposium and learning event.
- Cancer Awareness Drive (Nov 2024):** Designed awareness posters for a campus social impact initiative.
- Enactus REC (Oct 2024 - May 2025):** Contributed to collaborative projects and leadership activities as a selected member.

Education

- Rajalakshmi Engineering College** Chennai, India
Bachelor of Technology(B.Tech) in Artificial Intelligence & Data Science - CGPA: 7.744/10.0 Aug 2023 – May 2027
- Shree Niketan Matric Higher Secondary School** Tamil Nadu, India
Higher Secondary Certificate (HSC) - 87.67% 2021 – 2023

Extracurricular Activities

- Marathon Runner – Completed two 5 km runs
- Poster Designing – Proficient in Canva and Figma
- Cycling Enthusiast
- Badminton Player
